PRODUCT RANGE

Printing Chemicals

... for better printing

Our printing chemicals are used for quality optimization of the printing process and the printing products as well as for cleaning and maintenance of printing presses and equipment. In order to ensure the high and consistent quality, our products are continuously checked and monitored in the production plants as well as in our laboratory. Apart from consequent quality controls, our chemists and technicians in the laboratory perform important developmental work optimising our products and preparing them for future developments in the market.

A quality system built according to DIN ISO 9001 is documented and is available for our customers on request.
