

SCHWEGO® drier 8141

Drying agent as additive to fountain water

Function: **SCHWEGO® drier 8141** is a cobalt-free surface drier that is added to the fountain water. The printing image will harden more rapidly; the printed sheet is sooner ready for handling.

The effect of this drier will not be felt until it is applied on the substrate.

It is especially suitable for non- or poorly absorbing substrates, particularly boards with high or varying residual moisture. For extremely smooth surfaces, film-laminated papers and label printing.

Properties:

- Rapid surface drying
- No need for classification
- The abrasion resistance of the ink is improved substantially
- Faster processing of the print stacks

Quantity to add: 1 – 3 %

Application: **SCHWEGO® drier 8141** is added to the fountain water which is ready for use.

Tip: Subject to appropriate storage, the described properties of **SCHWEGO® drier 8141** remain stable for at least 12 months.

Packaging: 1 kg bottle / 5 kg / 10 kg canister / 200 kg drum
